What do you like about wine ?

Complexity

My passion for growing vines and their fruit, the grape, began in my childhood. It has grown through encounters with men and women who share a deep love for winegrowing, as well as through continuous learning and the exchange of knowledge. This profession constantly challenges me to question my practices and embrace new discoveries in order to achieve the best balance between the terroir, the living soil and the vine. The goal is always to produce harmonious wines that truly reflect this balance. Located on the hillsides south of Sainte-Foy-la-Grande, my vineyard has been organically farmed since the 1990s on part of the estate, with the remaining parcels converted to organic farming when I took over the estate in 2011.
